## “Service Plus” – Beyond Simple Drum Handling Service

Liftomatic offers a variety of repair and refurbishment options through our “Service Plus” program. Your Parrot-Beak® drum handling units can be serviced at our facility and brought up to factory specification. Turn-around times are held to a minimum (typically less than 48 hours to complete all work). After giving you a quotation on the repairs we test the units, correct deficiencies to avoid possible down-time and will re-paint and re-label if each unit. Call us toll free at 800-837-6540 and ask about **Service Plus**, or visit us online at [www.liftomatic.com](http://www.liftomatic.com) for more information on proper maintenance of your Liftomatic units.

## Liftomatic Maintenance and Parts!

Liftomatic maintains a complete supply of replacement parts, repair items and full preventive maintenance kits to keep your Parrot-Beak® drum handling equipment up and running. Full schematics, disassembly instructions, maintenance “how-to” lists and safety tips are available with every purchase of parts or repair items and are also listed on the Liftomatic website at [www.liftomatic.com](http://www.liftomatic.com). All parts ordered by noon Central time are shipped the same day. Call our service department for assistance with any repair or for technical information and PM consultations.

## Customized Drum Handling Projects? Bring 'em on!

Are you looking for a custom drum handling solution for a problem in your plant, lab or warehouse? Since 1947, Liftomatic has specialized in finding creative, economical solutions to handling all varieties of steel, plastic and fiber drums. Armed with practical experience and the latest engineering tools,

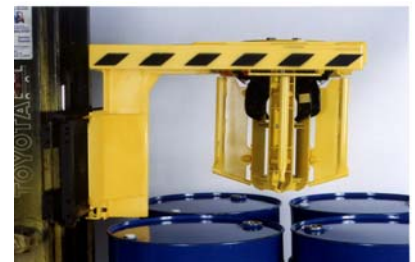

Ergo1000-SRJ-PWPL-EX

we'll work with you to find a good solution. Tell us about your custom drum handling needs and let's discuss how Liftomatic's 60 years of custom experience can benefit your plant or warehouse. If it's a drum and it can be lifted, we'll show you a sensible, economical way to reach your goals. Call us at 800-837-6540.

## High Volume Drum Handling— 1,2,3 or 4 at a time!

Steel drums. Plastic drums. Fiber drums. Nearly any kind of drum. The LOM-4 models are designed to handle 1,2,3 or 4 drums at once. Automatic and mechanical, the LOM-4 offers the user a mechanical handling device to unitize any drum load. Work on pallet load changes, to

or from scales, trucks, containers, flatbeds or fill lines. Take drums to storage, to or from stacks- in and out of the warehouse. Anywhere— anytime— any product, the LOM-4 can deliver. Call for a free video and to arrange a demo. We're here to help at 800-837-6540.

MODEL: LOM-4

## Power Drive, Power Lift, Power Drum Handling!

Liftomatic's ERGO750-PWPL-CB revolutionizes portable drum handling units. Features such as power drive, lift & lower functions, a 20" vertical lift and 750 pound (341Kg) capacity give the user a wide variety of options. Place drums on and off pallets, scales or platforms. Place them into spill containment devices or cabinets—virtually anywhere a drum needs to be lifted and lowered without manhandling! Heavy

duty power drive eliminates fatigue, allows for long distance travel and is equipped with full safety features for your operators. Counterbalance design reduces footprint and creates tight turning radius for working in narrow aisle or space-restricted areas. Padded belt-cradle protects drum sidewall during lift, lower and transport. Battery charger included with unit. Call for a free brochure! 800-837-6540.

Model: Ergo750-PWPL-CB

## Steel Drums? Line 'em up!

Model: 4-FTA-BC

The Liftomatic FTA line of "Parrot-Beak" drum handling attachments offer the user a simple, efficient and effective way to safely handle all steel drums. With weight capacities of 1500 pounds per drum, safety padded belt-cradles for cushioning the drum's sidewall and with fork pocket entry that makes pick-up a simple propo-

sition for the driver, the FTA is the single best way to greatly improve safety and efficiency while lowering drum damage and mishaps. Fork and carriage mount units are offered for handling 1-4 drums in a row. Call us at 800-837-6540 today for a brochure and to arrange a demonstration. We look forward to your call!

## Unchain Your Drum Handlers

1-DCM-BC-ADJ-SOM-QC

The exclusive Liftomatic "Quick-Claw"® safety device automatically locks the attachment to the forklift. This eliminates the need for an operator to get on and off the lift truck to hook up a safety chain. The gravity and spring operated cam system engages as soon as the forks

are raised off the ground, preventing the attachment from coming off during use. To retract, simply lower the attachment back to the ground and back away! For more information on the Quick-Claw, call us at 800-837-6540 or visit [www.liftomatic.com](http://www.liftomatic.com) for details.
